LLOYD'S REGISTER OF SHIPPING

REGISTER OF YACHTS
1958

Price: £4 10 0 per copy
Including Two Supplements

PUBLISHED IN APRIL

Lloyd's Register of Shipping,
71, Fenchurch Street, London, E.C.3

601

YACHTING PUBLICATIONS ISSUED BY THE COMMITTEE OF LLOYD'S REGISTER OF SHIPPING

REGISTER OF YACHTS. Published annually in April at £4 10s. 0d. per copy. Two supplements are issued, one with the Register and the second about the end of July.

REGISTER OF AMERICAN YACHTS. This Register is published annually in May at $20 per copy from the Society's New York office.

This book contains the names, dimensions, and full particulars of yachts of the United States and Canada, so far as they are ascertainable; reproductions in colour of the burgees of yacht clubs and the private signals of yachtsmen; a list of yacht clubs with the names of their officers; an index of signal letters; late names of yachts; and a list of yacht owners of the United States and Canada, with their addresses, clubs and yachts.

RULES FOR THE CONSTRUCTION AND CLASSIFICATION OF YACHTS:—

WOOD AND COMPOSITE YACHTS (Sailing, Auxiliary, and Full Power). £2 2s. 0d.

STEEL YACHTS. £2 2s. 0d. (under revision).

YACHTS OF THE INTERNATIONAL RATING CLASSES. £1 10s. 0d.

Attention is called to the brochure, available free on request, describing the yacht survey facilities made available to yachtsmen by the Committee of Lloyd's Register of Shipping.

Enquiries regarding the above publications should be addressed to The Editor, Register of Yachts, Lloyd's Register of Shipping, Garrett House, Manor Royal, Crawley, Sussex.

FOREWORD

FORMED nearly 200 years ago, Lloyd's Register of Shipping is a voluntary association of those interests primarily concerned with shipowning, shipbuilding and marine underwriting, and the superintendence of its affairs is directed by a General Committee of Management representative of those interests. It is not a trading concern, has no shareholders and consequently has no interests to consider beyond those which it serves.

Through its Technical Committees the Society ensures that its Rules both for deep sea ships and yachts are kept abreast of current developments, special panels being appointed to deal with specific subjects.

THE 1958 EDITION OF THE REGISTER OF YACHTS

The Register Section of the 1958 edition of the Register of Yachts has been entirely re-set in an up-to-date type face, and the book has been printed on a specially made thin but strong paper to reduce its bulk. Opportunity has been taken to re-arrange the particulars of yachts in a form which is believed to be more rational and convenient to Subscribers, and a geographical list of the Yacht and Sailing Clubs has been added to the appendix sections. To conserve space and in the interest of clarity a few details hitherto appearing, chiefly in entries of classed yachts, have been omitted, but in general the traditional information has been retained. Both the Port of Registry and the Home Port are now shown. It is hoped that the Register in its new form will be appreciated by the yachting fraternity.

THE REGISTER OF YACHTS was first issued by the Committee of Lloyd's Register of Shipping in 1878 together with Rules and Regulations for the classification of this type of craft and the Society's Rules are accepted throughout the world. The Register has been issued annually ever since, except during the two world wars. Two Supplements are printed each year, one being distributed with the book itself and the other about the end of July.

The 1958 Register contains as usual the names, details and characters of all yachts classed by the Society, together with particulars, so far as known, of other British and overseas yachts which are considered to be of general interest, and much other information of interest to yachtsmen.

The Register lists details of Canadian yachts; but so far as concerns the United States craft only the larger yachts and those holding the Society's classification are included in this volume, as a separate Register containing a list of yachts of the United States and Canada is published annually in May from the Society's Office at 17, Battery Place, New York.

Subscribers are entitled to have full particulars of their yachts entered in the Register, irrespective of size, otherwise it is the practice to restrict the entries in general to sailing yachts of a sail area not less than 300 sq. ft. and to motor yachts 25 ft. and over on the water line.

The Racing Yacht Section, however, which immediately follows the main Register Section, includes in addition to the sail numbers and names of yachts of the International Rating Classes, Ocean Racing Classes, etc., the sail numbers, names, and names of the Owners of yachts holding valid Certificates of Rating in all the British National Classes. Similar particulars are given as far as possible for 5 Metre, Dragon and other national classes overseas and this information is supplied by the respective National Authorities.

The mere entry of the particulars of a yacht in the Register of Yachts does not constitute either classification or official registration. Classification is referred to on the next page, but official registration is not a function of Lloyd's Register of Shipping, and is dealt with by the National Authority of the Country to which the yacht belongs. In the British Isles official registration is effected through the Commissioner of Customs, who is represented as Registrar by the Chief Officer of Customs at the Port of Registry chosen by the Owner. In countries of the British Commonwealth it is a matter for the officer appointed by the appropriate authority. Further information on the subject of official registration may be obtained from the Registrar-General of Shipping and Seamen, Llantrisant Road, Llandaff, Cardiff.

Cuttings of all the craft listed in the main section of the Register are sent to the respective Owners annually at the beginning of October, and should be returned promptly with any necessary comments. In the absence of any information from the owners or other sources over a considerable period, it is assumed either that the yacht is no longer sailing, or that the standing entry is no longer reliable, and the particulars are usually removed from the next edition of the Register.

The Editor wishes to thank Yacht Owners for their co-operation and hopes that this will be continued so that the Yacht Register may be as comprehensive and accurate as possible.

YACHT CLASSIFICATION AND CONDITION SURVEYS

Classification

Classification is open to all types of yachts provided the constructional details conform to the requirements laid down by Lloyd's Register of Shipping. An Owner desiring classification should, when ordering a new yacht, specify that the yacht be built to Lloyd's Register of Shipping class. The Builder will then, through the Designer, become responsible for submitting the necessary plans for the Society's approval, and will request a special survey during construction in accordance with the Society's requirements, so that the appropriate class may be assigned on completion.

Yachts built throughout under Lloyd's Register of Shipping supervision in conformity with the Rule requirements are assigned the distinguishing ✠ in the Register against the symbol of classification, and this cross is retained in the book even if classification is later discontinued. Subject to the conditions for yachts already built, an existing yacht can be submitted for class at any time, but without the ✠. Conversely, class may be allowed to lapse if the Owner so desires.

For maintenance of classification, periodical surveys and repairs are carried out under the supervision of Lloyd's Register of Shipping Surveyors; such a procedure helps to keep a yacht in a high state of efficiency and to preserve her sale value, in addition to the benefit of having a competent, independent and experienced organisation to safeguard the Owner's interest. A record of each periodical survey is made in the Yacht Register.

Condition Surveys

The Committee of Lloyd's Register of Shipping are prepared to undertake Condition Surveys on yachts, whether classed or not, prior to purchase or in any other circumstances. Details of this service, and of the terms on which it is undertaken, will be supplied upon request to the Yachting Manager.

Lloyd's Register of Shipping Surveyors qualified to undertake surveys on wood yachts are stationed at London, Glasgow and Southampton and can, by arrangement, hold surveys at other ports in the U.K. A list of the Society's Offices at ports throughout the world appears on pages ix to xii.

KEY TO REGISTER OF YACHTS

SYMBOLS OF CLASSIFICATION, COLUMNS 6, 7 & 8

(All Abbreviations employed in the Register are explained in the Alphabetical Key, page xix.)

100A1 This Character will be assigned to Wood, Composite and
Yacht Steel Yachts built in accordance with, or by standards equivalent to, the relevant requirements of the Society's Rules for the Construction and Classification of Wood, Composite and Steel Yachts.

In the case, however, of Yachts designed and intended for racing under the International Rating Class Rules, the following Characters of Classification and Notations will be assigned, viz:—

100A1 with notation Built to Int. Cruiser/Racer Class—metres.
Yacht This class will be assigned to Wood Yachts designed for racing under the Rules of the International Yacht Racing Union for the International Cruiser/Racer Classes, 7 to 12 metre rating, and built in accordance with the Society's Rules for the Construction and Classification of Wood and Composite Yachts.

100A1 with notation "International Rating".
Yacht This class will be assigned to Composite Yachts over 14½ metre rating and to Steel Yachts, designed and intended for racing under the Rules of the International Yacht Racing Union for International Rating Classes, and built in accordance with the Society's Rules for the Construction and Classification of Steel Yachts as applied to International Rating Classes.

In the case of Wood and Composite Yachts classed **100A1** Yacht a grading number regulated by the description of the timber and fastenings used in the construction of the hull and computed as described in the Construction Rules, will be entered in the Yacht Register thus: Materials 14.

A Wood or Composite Yacht already holding the class **A** with a term of years will, on written application from the Owner, be eligible for the class **100A1** Yacht, provided that at a Special Survey the Yacht be found to be in accordance with, or of standards equivalent to, the full requirements of the Society's Rules for this class.

Wood, Composite or Steel Yachts now classed **A** or A, as the case may be, in the Yacht Register, will continue to be so classed so long as they comply with the Society's Rules and requirements for periodical surveys and maintenance. The class **A** or A, will not, however, be assigned to any Yacht submitted for classification or re-classification.

SYMBOLS OF CLASSIFICATION, COLUMNS 6, 7 & 8—*continued*

It is therefore anticipated that classed yachts (except those classed **R**, **A**, or **A**) will change over to the new classification symbols as they become due for Special Survey, and that in time all classification symbols in the Yacht Register will appear as **100A1** Yacht.

Owing to the number of yachts classed in the Yacht Register under the late Rules, the following explanations of the classification symbols are continued:—

A Without a numeral prefixed, character assigned to steel yachts not built in accordance with the requirements of the Society's Rules, but found to be efficient.

A Character assigned to wood or composite built yachts. The figures prefixed to the character thus, **18 A, 12 A**, indicate the term of years for which the vessel is at present classed. Where this term follows the sign ✠ (indicating construction under the Special Survey of the Society's Surveyors) it commences at the date of build shown in Col. 6. Figures placed within parentheses thus, **(17) A, C**(11), indicate the expired term of years—originally if on the first line, and on continuation or restoration if on lower lines.

A Without a term of years indicates that the yacht, though not built according to the Society's Rules, is considered worthy of the class assigned.

R Character of Class of yachts built in accordance with the Rules for Yachts of the International Rating Classes both as regards scantlings and equipment. The figures prefixed to the character thus, **16R, 14R**, in the case of wood and composite yachts, indicate the term of years for which the yacht is at present classed.

1 The figure **1** after a character signifies that the yacht is well and efficiently equipped (*see* Equipment Tables of the Society's Rules for Yachts).

A line thus — after the **A** or A signifies that full requirements of the Society's Rules in respect of equipment have not been complied with.

In the case of yachts classed **R**, the figure **1** for equipment is not employed, the equipment being required in these cases to be in accordance with the Rules for Yachts of the International Rating Classes before the class is assigned.

The figures under a Character denote the date when the yacht was last examined on a slip or in a dry dock by the Society's Surveyors.

When the date of survey only appears without the Character of Class, the Class has expired, been withdrawn at Owner's request, or been expunged.

✠ This sign before a Character thus, ✠**100A1**, denotes that the yacht has been built under the Special Survey of the Society's Surveyors.

✠ This sign before a classification record of machinery thus ✠**LMC** indicates that the engines have been built under the Special Survey of the Society's Surveyors (the date following being the last date of examination).

✠ This sign before a classification record of engines thus ✠**NE** indicates that the engines have been built under the Special Survey of the Society's Surveyors (the date following being the date of build).

LMC This notation indicates that the engines have been built in accordance with the Society's Rules. If preceded by the sign ✠ it signifies that the engines have been built under Special Survey of the Society's Surveyors.

NE Indicates new engines, the date following being the date of build. If preceded by the sign ✠ it signifies that the engines have been built under Special Survey of the Society's Surveyors.

When Column 8 is left blank, the yacht has never been Classed in the Society's Register of Yachts.

EXPLANATION OF RECORDS IN THE REGISTER OF YACHTS

N.B.—The material of construction, formerly shown in column 2, is now omitted except where other than wood.

Similarly, the rig of sailing yachts is only shown in column 2 when other than Bermudan.

Consecutive No. (column 1). The number in Black figures is the consecutive number of the yacht in the Register and usually changes with each edition.

Official No. (column 1). The number in lighter figures is the official registered number of the yacht, assigned by the National Authority. In the case of British and Commonwealth yachts it is assigned by the Registrar-General of Shipping and Seamen, Llantrisant Road, Llandaff, Cardiff.

Signal Letters (column 1). These are assigned by the National Authorities.

Tonnage (column 4). Thames Measurement Tonnage is an approximate representation of the internal capacity of a yacht derived from a system of measurement adopted by the Royal Thames Yacht Club in 1854. The formula for computing the Thames Measurement tonnage is as follows.:—

$$\frac{(L - B) \times B \times \frac{1}{2}B}{94}$$

Where L = length measured from the fore side of stem to the after side of sternpost on deck.

B = extreme breadth.

In the case of a British yacht officially registered but not classed with Lloyd's Register, the registered length is used in the Yacht Register in computing the Thames Measurement Tonnage.

This tonnage appears in the Register in the case of every yacht where these dimensions are known, and is printed below the official tonnages where these tonnages are given.

Where yachts are officially registered, the official registered tonnage measured according to the law of the country to which the yacht belongs is recorded in type like that shown at the side hereof. } 204·51 (Net) 546·65 (Gross)

When the tonnages are given in italics, they are not those assigned by the country to which the yacht now belongs. } *204·51* (Net) *546·65* (Gross)

Dimensions (column 5). The dimensions which are printed on the top line are given in feet and tenths of a foot and are those employed for calculating Thames Measurement tonnage. In the case of yachts classed by Lloyd's Register, these are obtained from the Society's Surveyor's First Entry Report of Survey; where yachts are not classed by the Society, but are officially registered, the dimensions are obtained from the vessel's Certificate of Registry. In other cases the dimensions are as given on returns received from Owners, Builders, etc.

The **length** entered on the top line is the length measured from the fore side of stem to the after side of sternpost on the range of the upper deck, except in the case of unclassed yachts which are officially registered as British vessels, when the registered length is recorded.

The length entered on the second line is the length over all.

The length entered on the third line is the length on the water line.

The **breadth** recorded is the extreme breadth.

The **depth** is taken from the top of floors to top of upper deck beams amidships.

The **draft** is the maximum draft to bottom of keel.

The **sail area** recorded is the area of the working sails and is given in square feet.

Date of Build (column 6). This is recorded as follows in the cases of yachts built under Lloyd's Register Special Survey.:—

Prior to 1903	Date of Launch.
From 1903–1924	The last date of survey for first entry of classification when completed within six months of launching; otherwise six months after date of launch.
After 1924	Date of completion of Special Survey.

EXPLANATION OF RECORDS IN THE REGISTER OF YACHTS—*continued*

Internal Combustion Engines (column 7)—

Oil Engine indicates an internal combustion engine using heavy oil as fuel.

Petrol Motor indicates an internal combustion engine using petrol or other highly volatile oils as fuel.

Paraffin Motor indicates an internal combustion engine using paraffin oil as fuel although started up on petrol.

Engine particulars (column 7) include the number and diameter of cylinders and length of stroke. Since 1952, however, in the case of unclassed machinery, the brake horsepower, as published by the engine makers, has been inserted in place of the cylinder bore and stroke where this information is known.

An asterisk * (column 3) before an Owner's name indicates that he has obtained a Certificate of competency as Master, as issued by the National Authority.

The **R.O.R.C. Ratings, Time Correction Factors** and **Basic Speed Figures** are furnished by the Royal Ocean Racing Club.

Signs and Abbreviations

Abbreviation or Sign	No. of Column	Signification
a	6	Aft
alts	2 or 6	Alterations
APT	6	After Peak Tank (with tons)
AS	8	Annual or occasional Survey as prescribed in the Society's Rules for Yachts of the International Rating Classes (with date)
B	7	Boilers (with number prefixed)
BF	6	Bronze floors
BH	6	Bulkheads (with number prefixed)
BHP	7	Brake Horse Power as specified by the manufacturers
BiS	8	Biennial Survey as prescribed in the Society's Rules for Yachts (with date)
BK	6	Bar Keel (with depth)
BSF	2	Basic Speed Figure
C	6	Coppered (with date)
C	7	Compound Engines
C	8	Placed before figures in parentheses thus, **C(8)**, signifies the term of years for which the class of the yacht had been continued but which is now expired
c.b.	2	Centre Board
CF	6	Copper fastened in accordance with the Rules for Yachts
compl.	6	Completed
ContS	8	Continuation of Class with date of Survey, also number of years for which the Class is continued
conv.	2 or 6	Converted
Cut	2	Cutter
Cy.	7	Cylinders (with number)
DBS	8	Donkey Boiler surveyed (with date), as prescribed in the Society's Rules for Yachts
Ddy	2	Dandy
DF	2	Direction Finder (Wireless)
DS	8	Docking Survey (with date) as prescribed in the Society's Rules for Yachts
DT	6	Deep Tank (with tons)
ES	8	Engine Special Survey (with date) as prescribed in the Society's Rules for Yachts
ESD	2	Echo Sounding Device
f	6	Forward
FK	6	Flat Keel
FPT	6	Fore Peak Tank (with tons)
GC	2	Gyro-Compass
GF	2	Galvanised fastened in accordance with the Rules for Yachts
Gtr	2	Gunter
HT	8	Half Time Survey (with date) as prescribed by the Society's Rules for International Rating Class Yachts
IB	6	Iron Bolts
I.C/R	2	International Cruiser/Racer
I.R.C.	2	International Rating Class
Kch	2	Ketch
LA&CP	8	Anchors and Chain Cables proved at a machine under the superintendence of the Committee of Lloyd's Register. (See Equipment Tables in the Society's Rules for Yachts.)
Lch	2	Launch
LCP	8	Chains proved at a machine under the superintendence of the Committee of Lloyd's Register. (See Equipment Tables in the Society's Rules for Yachts.)
len.	2 or 6	Yacht lengthened (with date)
LMC	8	Lloyd's Machinery Certificate assigned to the machinery denoting that it has been constructed in accordance with the Society's Rules. If preceded by ✠ signifies that the machinery was constructed under the supervision of the Surveyors to Lloyd's Register
lrp	2 or 6	Large repairs to hull of Yacht
Lug	2	Lugger

Abbreviation or Sign	No. of Column	Signification
Mat	8	Materials (with number) indicating the different grades of wood used in Yacht's construction when originally built or at date of classification.
MBS	8	Main Boiler Survey (with date)
Mchy aft	2 or 7	Machinery fitted aft
MES	8	Modified Survey of Engines (with date) as prescribed by the Society's Rules, satisfactorily completed by the Surveyors to Lloyd's Register.
MN	7	Machinery Numeral. For yachts classed with Lloyd's Register the numeral is one-fifth of the total horsepower for which the prime movers have been approved.
mot. inst.	7	Motor installed (with date)
MT	6	Midship deep tank (with tons)
ND	2 or 6	New Deck (with date)
NE	8	New Engines (with date of build). If preceded by ✠ signifies the survey of engines during construction by the Surveyors to Lloyd's Register
nkl	2 or 6	New Keel
OF	7	Fitted for oil fuel (date) FP above 150° F.
PFD	2	Position Fixing Device
pt	2 or 6	Part
Q	7	Quadruple Expansion Engines
R	8	Placed before figures within parentheses, thus **R(8)** signifies the term of years for which the class of the yacht was restored, but which is now expired
RDR	2	Radar
reb.	2 or 6	Rebuilt
RefMchy	2	Refrigerating Machinery
rem.	2 or 7	Removed
RenS	8	Renewal Survey (with date) as prescribed in the Society's Rules for Yachts. If the survey took place prior to revision of the Rules in 1954 the term of years for which the Class is renewed is shown
Rest	8	Restoration of Class, with date of survey, and number of years for which the character **A** or **R** is restored
RT	2	Radio Telephone
SBS	2	Submarine Signalling Apparatus
Sc	2	Screw
2 S.C.	7	2 stroke cycle
4 S.C.	7	4 stroke cycle
Sch	2	Schooner
(side ppr)	7	Side Propeller
Slp	2	Sloop
Smk	2	Smack
SPS	8	Steampipe Survey (with date)
SS	8	Hull Special Survey (with date) as prescribed in the Society's Rules for Yachts
SS(Dr)	8	Hull Special Survey (with date) at which drilling tests have been made
Stm	2	Steam
t	6	Tons (water ballast)
T	7	Triple Expansion Engines
TCF	2	Time Correction Factor
Trp Sc	2	Triple Screws
TS	8	Tailshaft Survey (with date) as prescribed by the Society's Rules
TS...B	8	Tailshaft Survey (with date) as prescribed by the Society's Rules, of bronze shaft
TS(CL)	8	Tailshaft Survey (with date) as prescribed by the Society's Rules, of shaft fitted with continuous liner
TSN	8	Tailshaft renewed, and date
TS(OG)	8	Tailshaft Survey (with date) as prescribed by the Society's Rules, of shaft fitted with approved oil retaining glands at after end of stern bush
Twn Sc	2	Twin Screws
WB	6	Water Ballast
WT	2	Wireless Transmitter
WTB	7	Water-tube Boilers
Ywl	2	Yawl

REGISTER OF YACHTS

1958

Extract from the Society's Rules

"While the Committees of the Society use their best endeavours to ensure that the functions of the Society are properly executed, it is to be understood that neither the Society nor any Member of any of its Committees is under any circumstances whatever to be held responsible for any inaccuracy in any report or certificate issued by the Society or its Surveyors, or in any entry in the Register Book or other publication of the Society, or for any error of judgment, default, or negligence of any of its Committees or any Member thereof, or the Surveyors, or other Officers or Agents of the Society."

Every effort is made to ensure the accuracy of the information contained in this book.

It must, however, be appreciated that many changes of ownership, name, class and other particulars occur during the currency of this edition and after the issue of the two Supplements.

The Register and Supplements can therefore never be entirely up-to-date.
